C = Number of hours the equipment is under major overhaul or under scheduled (or periodic) maintenance or under preventive maintenance in a month,

D = Number of hours the equipment is under breakdown maintenance in a month.

$$\text{Then } B = A - (C + D)$$

$$\text{Availability} = B/A.$$

Licensee shall handle minimum cargo as detailed below or tonnage of proportionate hours of actual working hours.

For Dry Bulk Cargo - 12500 Metric tonnes (average)/per day per crane

For Break Bulk Cargo

Steel and Bagged Cargo - 6000 Metric tonnes (average)/per day per crane

The calculation of actual working hours of HMC is as under:

Working Hours = 24 hours - the time not attributable to the HMCs.

Accordingly, the berth day output will be worked out.

3. Penalty if Minimum Guaranteed Availability is not achieved

Since the hire of crane is based on tonnage, 25% of revenue share applicable to shortfall in working hours below 90% multiplied by normative tonnage (lowest tonnage among various cargo groups) and multiplied by the rate applicable for normative tonnage under the head “Foreign” will be collected as penalty.

The equation is as under:

Penalty = 25% X The normative tonnage (lowest tonnage among various cargo groups) for shortfall period X Revenue share X Tariff for normative tonnage / T

Example:

The normative tonnage is 6,000 tonnes/ days. If there is a Shortfall in availability is 24 hrs, the normative tonnage for short fall of 24 hrs is 6,000 tonnes. The Tariff for normative tonnage is Rs.157.58 per Ton. The penalty towards shortfall in Minimum Guaranteed availability is as follows:-

Penalty = 6000T X 26.55% X 25% X Rs.157.58/T = Rs.62,756/-

4. Penalty if the Minimum Guaranteed Efficiency is not achieved

Penalty will be levied for the short fall in the Minimum Guaranteed Efficiency at a rate of 25% of the revenue share corresponding to the short fall in the tonnage multiplied by the rate applicable for normative tonnage under the head “Foreign”

Penalty = 25% X The shortfall tonnage X Revenue share X Tariff for normative tonnage / T

Example:

Consider there is a Shortfall in efficiency of 1000T. The Tariff for normative tonnage is Rs.157.58 per Ton. The penalty towards shortfall in Minimum Guaranteed efficiency is as follows:-

Penalty = 1000T X 26.55% X 25% X Rs.157.58/T = Rs.10,459/-

Note :i) The Minimum Guaranteed Availability of Harbour mobile cranes and Minimum Guaranteed Efficiency will be monitored by Traffic Department of V.O.Chidambarabar Port Authority

iv. No claims for refund shall be entertained unless the amount refundable is Rs.100/- or more. Likewise, the operator shall not raise supplementary bills for short collection, if the amount due to the operator is less than Rs.100/-.

v. (a). The rates prescribed in the Tariff are ceiling levels: likewise, rebates and discounts are floor levels. The operator may, if they so desire, charge lower rates and / or allow higher rebates and discounts.

(b) The operator may also, if they so desire rationalise the prescribed conditionalities governing the application of rates prescribed in the Tariff if such rationalisation gives relief to the user in rate per unit and the unit rates prescribed in the Tariff do not exceed the ceiling levels.

(c) The operator should notify the public such lower rates and / or rationalisation of the conditionalities governing the application of such rates provided the new rates fixed shall not exceed the rates notified by VOCPA.

vi. Users will not be required to pay charges for delays beyond reasonable level attributable to operator.

Note: To calculate the incremental ceiling rates as shown above, the base rate was enhanced to 105% for first thousand tonnes and for the 2nd thousand tonnes the rate was enhanced to 110% of the base rate. The rate for third thousand tonnes was arrived by enhancing the base rate by 115%. The same methodology shall also be adopted to calculate the rate beyond 18000 tonnes. Likewise, ceiling rates for performance below 12000 tonnes shall be calculated by reducing the base rate accordingly.

(II).For Break-bulk cargo:

A. Steel and Bagged Cargo

Average daily crane performance (in Metric tonne)	Ceiling rate per tonne (in Rs)	
	Foreign	Coastal
5000-5999	84.284	50.5685
6000	88.72	53.23

(III) Others:

Description	Rate per hour or part thereof	
	Foreign (Rs.)	Coastal (Rs.)
Other than Steel and Bagged Cargo	50,602.71	30,361.63

Notes:

- i. The formula for calculation of average berth-day out put is as follows:

$$\frac{\text{Total Quantity loaded / unloaded by the HMC}}{\text{-----} \times 24 \text{ HRS}}$$

Total time taken from vessel commencement to completion

- ii. According to the average berth-day output for the vessel from commencement to completion of loading / discharge of cargo, the appropriate rate of crane hire charge will be chosen for recovery from port users for the full quantity of cargo loaded / discharged.
- iii. If one HMC works with another HMC or ELL crane/s, the Berth-day output for the crane will be ascertained on the basis of the quantity as recorded by the HMC's load meter.
- iv. In case of breakdown of the crane for more than one hour till the vessel leaves the berth, the quantity handled by HMC will be determined taking into account cargo loaded / discharged prior to break-down divided by crane working hours and multiplied by 24.
- v. In case of stoppages of operation of HMC for more than two hours at a stretch for reasons not attributable to the HMC, appropriate allowance will be allowed to the crane while calculating the total time of crane operation in the vessel. Stoppages of HMC for less than 2 hours will not be taken into consideration for the above purpose. No allowance will be allowed for stoppages attributable to the HMC. All stoppages in loading / unloading operations during working of HMC are required to be certified by the VOCPA Officers or any other agency nominated by the VOCPA in the daily vessel performance report.
- vi. In case shifting of a vessel becomes necessary due to breakdown / non-performance of HMC, the shifting charges of the vessel from berth to anchorage will be recovered from the crane operator in addition to a penalty of Rs.1,00,000/- (Rupees one lakh only). The shifting charges so recovered will be refunded to the vessel's agent while the penalty will be retained by the port.
- vii. In case of dispute on the average output, the decision of the VOCPA will be final and binding.

GENERAL NOTE TO SCHEDULE ABOVE:

The tariff caps will be indexed to inflation but only to an extent of 60% of the variation in Wholesale Price Index (WPI) occurring between 1 January 2023 and 1 January of the relevant year. Such automatic adjustment of tariff caps will be made every year and the adjusted tariff caps will come into force from 1 April of the relevant year to 31st March of the following year.
